

For our team in Bern – Switzerland we are looking for a

# Software Engineer C++

## You will

- Be responsible for developing a multidisciplinary medical system
- Take ownership of new features and modules, starting from high level requirement inputs via Software architecture and design of the solution, through implementation, testing and validation, to integration of the feature into the system
- Contribute to the company's knowledge base, toolset, infrastructure, methodologies, and best practices

## You have

- A Bachelor and/or Master of Science degree in SW Engineering
- 5 years' experience of software development with object-oriented programming
- Strong knowledge in C++
- Strong understanding of OOD and design patterns
- Strong mathematical and analytical skill set
- Experience with 3D mathematics
- Profound English and communication skills (written and verbal)

## You are

- A proactive, flexible, self-reliant problem-solver
- Responsible and well organized
- Able to troubleshoot and analyze complex problems

## Key points

- Start date: As soon as possible or by agreement
- Work load: 100%

## Why LEM?

- Because you want to take part in the development of the next generation of surgical robots!
