

For our team in Bern – Switzerland we are looking for a

Software QA Engineer

You will

- Design test plans, scenarios and procedures.
- Document software defects using a defects-tracking system and report defects to software developers.
- Review requirements, specifications and technical design documents to provide timely and meaningful feedback.
- Create detailed, comprehensive and well-structured test plans and test cases.
- Maintain manual test plans for both GUI and embedded software.
- Perform thorough regression testing when defects are resolved.
- Liaise with internal teams to identify system requirements.
- Investigate the causes of non-conforming software and train users to implement solutions.

You have

- Bachelor's and/or master's degree in Engineering, Computer Science or a related subject.
- 5+ years of proven work experience as a Software QA Engineer in a medical company with a multidisciplinary medical system.
- Strong knowledge of software QA methodologies, tools and processes.
- Experience in writing clear, concise and comprehensive test plans and test cases.
- Hands-on experience with manual and automatic testing tools.

You are

- A proactive, flexible and self-reliant problem-solver.
- Responsible and well organized.
- Able to troubleshoot and analyse complex problems.

Key points

- Start date: As soon as possible or by agreement.
- Workload: 100%

Why LEM?
