

Junior Software Test Engineer (100%)

Start date: 01.01.2025 or by agreement

We are a cutting-edge, fast-growing MedTech company based in Bern, Switzerland, revolutionizing robotic surgery by developing the next generation of spine surgical robots. This is a unique opportunity for recent graduates to take on meaningful responsibilities and make a real impact in a rapidly evolving field. Join our dynamic and talented team, where your passion for robotics, software testing, and innovation will be nurtured. You'll have the chance to grow, take ownership of your work, and help shape the future of surgical technology.

Key Responsibilities:

- Support verification and validation (V&V) activities, ensuring compliance with relevant medical device standards such as ISO 13485 and IEC 62304.
- Design, develop, and execute test plans, test cases, and test scripts to ensure the highest standards of software quality and functionality.
- Identify and prioritize critical areas requiring focused testing efforts.
- Generate detailed test reports, summarizing testing activities, outcomes, and the status of defect resolution.
- Contribute to the maintenance of comprehensive documentation for software development, testing, validation, and maintenance processes, ensuring full compliance with regulatory requirements.

Your Profile:

- Bachelor's or master's degree in Biomedical Engineering, Robotics, Computer Science, or a related field from a reputable university.
- Strong academic performance with a proven track record.
- Excellent communication skills for effective collaboration and thorough documentation of processes and compliance.
- Strong mathematical and analytical skills, with attention to detail.
- Proficient in English, with strong written and verbal communication abilities.
- Flexible, dynamic, and passionate about robotics and technological innovation.
- Proactive, self-driven, and able to work independently.

Join LEM

Be a part of pioneering the future of surgical robotics with LEM's diverse, innovation-driven team. This is your opportunity to develop your career in a fast-growing high-tech MedTech company, where you'll enjoy a high degree of autonomy and independence. Your daily contributions will help shape cutting-edge technology and leave a meaningful footprint on the future of surgical innovation.
